

largest edible oil refinery in the world

Yihai Kerry Investment Co., Ltd. (Yihai Kerry Group) is Singapore's Fengyi International Co., Ltd. (SGX:F34) invested in edible oil processing, oleochemical, warehousing and logistics, and domestic and foreign trade. largest edible oil refinery in the world. The company is headquartered in Lujiazui, Pudong New Area, Shanghai, and is a Singapore-owned company. The Group has 38 factories and trading companies directly controlled in China. The factories are located in Hebei, Shandong, Jiangsu, Fujian, Guangdong, Guangxi, and other major coastal provinces as well as Sichuan, Hubei, Hunan, Xinjiang, Ningxia, Heilongjiang, etc. Regions, trading companies and offices have covered all provinces except Tibet and Hong Kong, Macao and Taiwan.

The annual oilseed crushing capacity of the group is 10 million tons, the annual refining capacity of oil and fat is 3 million tons, the separation capacity is 1 million tons, and the export soybean meal accounts for more than 70% of the total annual export volume. It is the largest oil and oil processing enterprise group in China. one. On the basis of vigorously developing oil and oil processing projects, the group has also comprehensively entered into grain and oil deep processing projects such as wheat, rice, cottonseed, sesame, and soy protein concentrate. At the same time, it has invested in holding and participating in railway logistics, storage and storage bases, and shipping. Auxiliary companies such as shipyards are operating in a variety of varieties and diversified. As early as 2005, Yihai Group began to shift its investment direction to other agricultural products processing fields and invested in Yihai Rice Industry in Heilongjiang.

In December 2005, Yihai (Jiamusi) Grain and Oil Industry Co., Ltd. was established to take charge of the northeast business of the group. Yihai (Jiamusi) Cereals and Oils Industry Co., Ltd. has cooperated with Heilongjiang Yihai Cereals and Oils and Heilongjiang Longliang Reserve Company to build large-scale storage and storage bases; carry out domestic and foreign trade such as rice and corn; set up logistics companies to connect transportation channels; build corn and rice Processing base; establish a large grain processing base in the main producing areas of high quality rice and soybean such as Jiamusi. Yihai Group has established a complete grain and oil business network in the three eastern provinces and parts of Inner Mongolia.

Since the 1990s,

Yihai Kerry Group has successively established major ports such as Shenzhen, Qingdao, Tianjin, Qinhuangdao, Lianyungang, Yingkou, Guangzhou, Shanghai, Quanzhou, Fangchenggang and Zhangjiagang, as well as Wuhan, Yueyang, Xi'an, Chengdu, Jiamusi and Xinjiang. Major cities such as Changji have invested in more than 40 factories and more than 20 trading companies, becoming internationally renowned grain and oil processing and trading companies, and successfully creating famous domestic brands such as "Arowana", "Koufu" and "Hujihua". In 2006, Kerry Grains and Oils, a subsidiary of the group, was selected as the exclusive supplier of edible oil for the 2008 Beijing Olympic Games.

Under the guidance of the national industrial policy, Yihai Kerry is based in China, actively participates in the construction of China's grain and oil industry, and develops a modern Chinese grain and oil industry. Through the integration and extension of the industrial supply

chain, the integration of the entire edible oil supply chain such as crushing, refining, small packaging oil, special oils and oleochemicals, mining scale, cost reduction and economic efficiency. Relying on the advantages of domestic grain cultivation, vigorously develop rice recycling economy and miscellaneous grains products, establish the development of seed industry companies, and improve the value of traditional agricultural products, increase the income of farmers, and actively increase the development of seed research, seed production, order planting, and order purchase. Support the implementation of the national three rural policies and build a strong agricultural country in China.

Adhere to technological innovation and enhance the quality and value of national grain and oil products. Established the Oil Research Center in Shanghai, hosted by foreign academicians of the Chinese Academy of Sciences, dedicated to research and development of edible oils and fats, safety, nutrition, special oil technology, baking raw materials and additives, and oleochemicals. At the same time, it also established a soybean deep processing research base in Qinhuangdao, Hebei, and a rice recycling economic research base in Jiamusi, Heilongjiang. Realize the value-added of grain and oil products and improve the international competitiveness of China's grain products to meet the increasingly rich consumer demand for grain and oil products.

Integrate the edible oil industry chain to realize vertical integration business models such as pressing, refining, small packaging oil, special edible oil and oleochemicals, and realize the development of industrial chain from raw material procurement and processing to marketing, branding, sales and distribution. Actively expand the extension of the industrial chain, give play to the advantages of domestic grain cultivation, base on independent and independent technology research and development, vigorously develop rice recycling economy and order agriculture, improve agricultural production and processing technology, enhance the added value of traditional agricultural products, increase farmers' income, and actively explore the country's "three rural" The practical experience of the policy contributes to the sustainable development of the industry.

Adhering to the central idea of science and technology leading the great development of the grain and oil industry in the motherland, setting up a global R&D center in Shanghai, hiring a number of academicians of the Chinese Academy of Sciences as technical consultants, giving full play to the experience and advantages of Wilmar International in diversified global businesses, and gaining insight into the global grain and oil industry. In the frontier technical field, in order to improve the international competitiveness of China's grain and oil products, we will strive to promote China's transition from "a major edible oil consumption country" to an "edible oil technology power country" to meet the increasing consumption of edible oil products by the state, society and consumers. continue trying.

Innovation is the soul of development, the driving force, and the responsibility. In order to meet the increasingly diversified health needs of consumers around the world, Wilmar International has set up a global R&D center in Shanghai. With the full support of the parent company, Yihai Kerry has established with more than 200 universities and 5 world-renowned food and nutrition authority societies. Cooperation, establish strategic partnerships with a number of multinational food giants, and use the wisdom and technology that leads the world to integrate the world's advanced cutting-edge scientific research results into every drop of oil and every grain of rice, so that consumers can enjoy Yihai Kerry. The happiness, warmth and care that this big family

brings.

With the rapid development of economic construction and various industries, resource shortages and environmental protection have become a topic of common concern around the world. Realistic production and life need to pay more attention to environmental protection and resource renewability. The development of edible oil chemical industry is in line with the requirements of the times. Its raw materials are derived from renewable resources, and its products have good biodegradability and high efficiency. The use performance has broad development prospects. The national economic construction and the rapid development of various industries, the demand for various edible oil chemical products in the rubber and cosmetics industries will further expand, and also create new opportunities for the development of the edible oil chemical industry.

Yihai Kerry's oil-making business started in 2004. In 2005, the production bases of fatty acid, glycerin and soap-related industries were completed and put into production. Based on the advantages of modern equipment and advanced production technology, it formed from south to north. Market service pattern, product structure is getting better and better; and maintain the characteristics of each production base, obtain KOSHER qualification and have the production characteristics of monomer acid production, glycerin GMP certification and food glycerin production license; Provide high-quality products for China's rubber, plastics, textile, paper, pharmaceutical, daily chemical, food and other industries. In addition, in order to enhance the competitiveness of customers' products and reduce production and transportation costs, the company will build a molding line for the production of camphor and ladle in some areas, and provide personalized OEM services for soap customers.

Yihai Kerry's "Ruילong" "Longqi" brand of edible oil chemical products including fatty acid series, glycerin series and soap series are widely used in China's rubber, plastics, textiles, paper, medicine, daily chemicals, food, Well-known brands in the coatings and tobacco industries provide a rich supply of raw materials for the development of China's edible oil chemical industry.

Established in 1991, Fengyi International Co., Ltd. is Asia's leading integrated agricultural group, ranking the forefront of the global food production industry. In 2018, the world's top 500 companies ranked 248th.

Wilmar International's business scope includes palm plantation, oilseed crushing, edible oil refining, sugar processing and refining, consumer product manufacturing, specialty edible oils, edible oil chemicals, biodiesel and fertilizer manufacturing, and flour and rice processing. The core of Wilmar's strategy is an integrated agricultural model that covers the entire value chain of agricultural commodities business, through the cultivation, processing, production and sales of agricultural products, and is involved in the production of a variety of agricultural products. Wilmar International's high quality agricultural products are the first choice for consumers and the food production industry. Its consumer packaging products are leading the market in many Asian and African markets. Wilmar International promotes sustainable development and is committed to being a corporate citizen who protects the environment, benefits the society, and plays the role of the world.

Wilmar International has 850 manufacturing plants and an extensive distribution network covering 50 countries including China, India and Indonesia, including many countries along the Belt and Road, with approximately 90,000 employees worldwide.

About [Yihai Kerry](#)

Up to now, Yihai Kerry has invested more than 30 billion yuan in the motherland and has 25,000 employees. It has established 70 production bases and 114 production-oriented entities in 25 provinces, autonomous regions and municipalities across the country. Involved in oilseed crushing, [edible oil refining](#), special edible oil, edible oil chemical, corn deep processing, deep processing of soybeans, rice recycling economy, wheat deep processing, food raw materials, grain and oil technology research and development

From November 30th to December 2nd, 2016, Yilong Kerry's Arowana became the largest edible oil producer. The honor of the famous brand of the industry.
